

#### B4 The Challenges of industrial and Factory farming

Write a short note:

I want to write a short note about the challenges of industrial and factory farming and how my eating habits relate to the graphic.

I eat no meat and few animal products.

But I am eating many products from other countries, many products from South America.

I think the rainforests are important and that's why I want to change that.

I want to eat more local products and I don't want to eat as much food from the supermarket as possible.
