

B5 Small or large

In this statement i will write about my opinion about industrial farming.

Machines can do more than humans,

Next, the contra arguments for industrial farming.

Industrial farming is not environmentally friendly,

they used chemical substances and they

are not environmentally friendly. The animals

are not doing well. They will be treated

badly. The animals are also fed with a

calorie and gain diet together with antibiotics

and hormones and that is not good for humans.

That are reasons why industrial farming is not

good. That's my opinion about industrial farming.
