

My opinion on industrial farming

B5 - Read the article "Farmer's Blog" and find out what industrial farming is.
- Write a statement about your opinion on industrial farming!

I'm against industrial farming. Because industrial farming can supply more people faster. But its also reliance of ~~using~~ using chemicals. Also it have a negative impact on the climate, and public health. Other than that, in my opinion, it is ethically unacceptable to treat animals like it's done in factory farming.

I think for now change and improvement always has something to do without something. But it is worth it!
