

B3

a)

1. Our food comes from different countrys for example a lime or something like this came from italy and the fruit will send to germany. Food from germany like potatos can send in to other countrys. Import export.

2. Here it depends on the type of food because you can buy organic quality and then it is produced differently from non-organic food.

3. I think the farming is very hard for the enviroment because not all farmings are organic and the non-organic farmer are not so well for the enviroment.

We must ^{take} care about the enviroment.

Arbeitsauftrag Englisch

a)

I think they wanna show us how different the whole eat cultures are.

In picture one are an, I think an American family.

In picture two are an Indian family they show what they eat.

I think that there are similarities everywhere but the main food are different.

b)

c)

differences:

The family in picture one have bought many things for the cooler and eat many species of meat. A another thing is the snacks, the American family bought many snack. The Indian family bought many fresh food for example salad and tomatoes.

Similarities:

The family is together and all eat together.

BRUNNEN All families has bought fresh food.

B3

b)

For me it is very important where my food produced because I hate it how many people handle with animals.

I only buy meat with organic quality.

Vegetables and fruits came from farmers from my town because here are so many farmers were you can buy organic food.

B5

a)

I think the biggest problem in the industry farming are medicines and pesticides for fast grown. A other thing is the animal husbandry because it is ~~is~~ ^{bad} to injured the animals.

b)

Pro

contra

- lower prices
- faster grown
- Machines are faster than human hands.
- Large greenhouses would reduce the limits of whether changes.

- Small farms would become extinct.
- Industrial Farming is not good for the environment.
- The Industry cannot produce with organic quality
- Animals are seen like objects for slaughter
