

## **B4 - The challenges of industrial and factory farming**

My eating habits have changed a lot in the last years, I pay attention to the keeping of the animals products I buy.

My family only buys eggs from free-range husbandry, no barn management.

The same with meat, even if the products are more expensive, the few Euros are worth it.

I am of the opinion that products where the animals are kept badly or not fairly should be banned.

Especially now with the corona crisis many people are making big purchases, but many people cannot afford to buy so much at once.

The poor countries don't even have the possibility to store food because there is not so much as in our country.
