

Text Small or large?

What is industrial farming

In my opinion is industrial farming bad for humanity

Many facts are against industrial farming for example that animals have to live in very small cages and they get fed with antibiotics. Also its bad that farmers spray chemicals on fruit to let them grow faster

Every piece of fruit, flesh or something else that has chemicals inside that is harmful for the human body. Its very good to look out for an other option to buy fresh or food.

We can buy only bio food.

Industrial farming is a step from Agriculture
