

B5

- a)
- industrial farming
 - missing workers
 - ~~the~~ winter ~~break~~
 - climate, changed climate
 - expensive machines
 - low profit margin
 - so much food thrown away

b) Pro

- lower prices
- more parts of plants
- Machines can a lot more
- feed more people
- Greenhouses reduce the limits climate

Contra

- needs chemical input
- negative impact on the climate, environment and public health
- mass husbandry
 - animals fed with antibiotics and hormones
- damage of soil and water
- 18% emission
- biodiversity

B4

a) The diagram shows the negative impact of industrial and factory farming.

b) I try to eat more organic food. But I sometime eat cheap products, from factory farming. So my habits don't relate
