

English – Homework

B5 Small or large

Task: Read the article "Farmer's Blog" and find out what industrial farming is!
Write a statement about your opinion on industrial farming!

I do not like industrial farming. Even if the food is produced faster and cheaper it is totally bad for our environment. The text also states that the industrial system of factory farming is obsolete and unsustainable because it relies on chemical use of pesticides and synthetic fertilisers, which have a negative impact on our climate. It is also totally harmful for us humans and for the environment. What they do with the animals I also find very bad. To be trapped in a confined space, to have no exit and never see sunlight is cruelty to animals. The pictures you see are also very horrible
