- ↳ Do you agree with the author? Why or why not? Write a comment on the article!
- ↳ React to the tweets below the article. Write a tweet yourself!

↳ This article is about how difficult it is for teenager in life because everything changes in her life. Your body changes, you get pimples, breasts, a voice crack or your period. But her emotions and psyche changes too. They want to be more freedom and independent and/or get lovesick. But all of them isn't enough. They are divided into groups. The cool ones, the stupid ones, the outsiders etc. Individuals are even bullied and despair. And finally, her dress style is also rated and they are classified.

↳ Hello guys, today it's about puberty and teenagers. It's always said that they have a hard time because of all the changes in and on the body. How do you see it? I'm not sure yet. It is really like that?

backside

Of course they have a harder time in  
some respects, but not as hard as adults are.  
It is time to comment.

## Coment

pro

- The hormones change
- In the past there was no other choice
- The whole body changes.

cons

- These are excuses for their behavior
- You take this too seriously because in the past all work normally too

↳ Lindsay's article is about puberty. The heading is called: "Being a teenager is the worst time of your life and here's why?" You could now agree or reject it and so we come to the contras. It's said that teenagers behavior is to hormones but did teenagers work <sup>50</sup> earlier? They helped the parents and sometimes even went to work to survive. So why should it be different today?

Of course, you can't contest these arguments but today it's a different time and in the past people, including teenagers couldn't live it out. They had to grow up <sup>100</sup> quickly. Today, they have the chance to deal with themselves more. Finally, the whole body changes and the psyche.

After looking at both sides I agree with the author because you have to deal with yourself in order to be happy. <sup>142</sup>
