

TB p.93 P11

Hello auntie Anne

today was my last day in the work placement in the doctor's praxis from Dr. Lang. The two weeks was had passed very quickly. It was very funny. It was strenuous, both it was very interested too. She say that she can imagine to make a training in the field. She liked that you do a lot with people and that you can help them. She would grandly do a longer work placement as a doctor in the summer holidays. Maybe as a dentist. She ask if you a dentist knows where to do an work placement?

Best regards, Elisa
