

TEENAGERS AND THE MEDIA

I use the same Media as most of my Friends. I would say I use social media a little bit different then most of my Friend because I mainly use it for inspiration and not just for entertainment. Also I think I'm in the middle range in terms how much I use social media. I had all my Social Media deleted for about two years. And I only downloaded them again because I know that I can trust me that I'm not on my Phone all day.
