

TBp. 93 PM

Hello Aunt Anna,

today was the last day of my internship in the medical practice of Dr. Lang.

The two weeks passed really quickly. I had a great time. It was exhausting, but totally interesting. I could imagine doing an apprenticeship in the field. I liked that you have a lot to do with people and can help them.

I would like to do a longer internship with a doctor in the summer, maybe with a dentist.

Do you know a dentist where you could get an internship?

Best wishes, Elisa.
