

Teenagers and Media

Comparison to the media usage of one of my friends:

The time we spend on Youtube and music is relatively similar but we use Youtube a bit differently. He mostly uses it to find interesting stuff about his hobbies. I also do that but I use it for so much more. I pretty much have everything I like, do and find interesting discovered on Youtube and I don't know if that's a good thing. My friend also doesn't use Instagram as much but plays a bit more video games and watches more TV shows than I do. I think we spend about the same time on media. Maybe I spend a little less.
