

## The American way of life

2. In the picture I see many people in a row. In the row are 19 people. The people are looking like they would wait for something. The people have a dark skin. Some people in the picture have bags and baskets in the hand. The picture is grey. The caption in the picture is „WORLD’S HIGHEST STANDARD OF LIVING“. Over the row are one woman, one man, and two children in a car with a dog. In the right side of the car with the people is written „There’s no way like the american way“. For me looks the picture like a poster which is showing us that black people aren’t so fine in America like white people.

3. For me is America having two faces, two sides. The first face are like the white people in the picture because they have it good and are happy. The second face are like the black people in the picture because they aren’t happy, they are sad. In the face you can see the pain. All in all in the picture are the white people the first happy face and the black people are the second sad face. Now is the person which the face belongs America. America is having two faces. Two faces because the black people are having compared with the white people many disadvantages. For example on the picture you can see that black people aren’t living like the white people. They need it to stand in a row. They aren’t so wealthy. To sum up the black people belongs to the parallel society in America, they aren’t treated well, and aren’t have the same chance like the white people to live like them.
