

# Generation Z

1.

“Generation Z” are the people who are born from 1996 to 2010. Their characteristics are that they have grown up with smartphones and social media and that they are afraid of the future and climate change.

2.

In my opinion the author is right that we can use Smartphones etc. better than the older generations, but I think he is not quite right, that our generation is more environmentally aware. I think 70% of the people of “generation Z” are indeed some afraid of the climate change, but they do not want to give up some of their lifestyle.
