

„Give us some feedback“

I liked the learning job because it's about the time, with all the teenagers, and that's why all the tasks were more interesting and I personally enjoyed it more. So actually it was quite cool to work with the apps, but it's difficult because it always takes so long to really know how to handle it.

I would prefer if we had one or maybe two apps where we work for the school and not so many different ones.
